UNLOCKING THE FUTURE OF ENTERTAINMENT

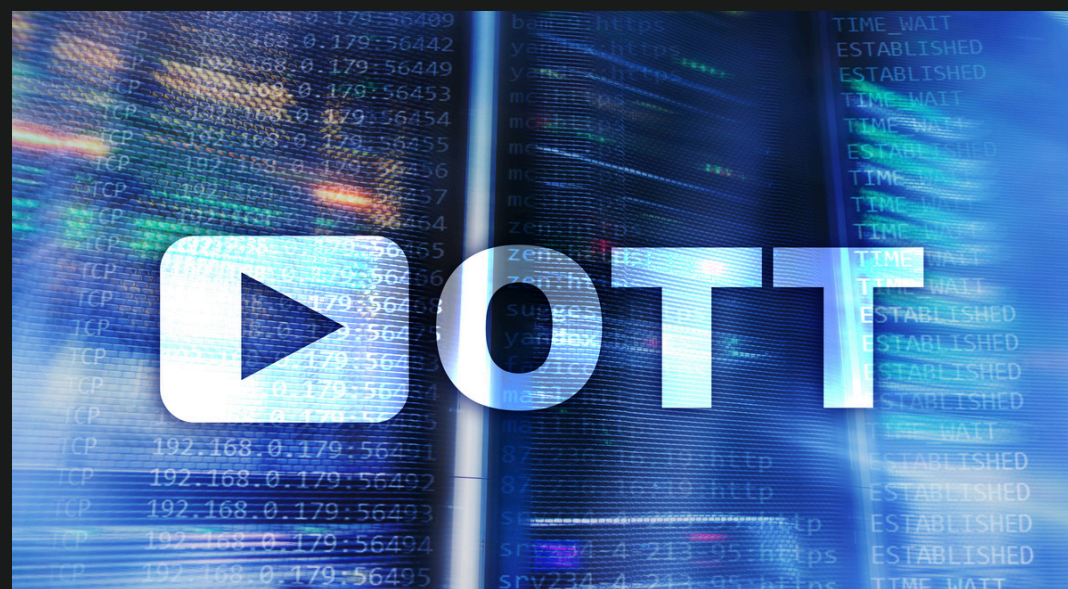

Touch Network's Investment Opportunity

INVESTOR DECK

INTRODUCTION

TouchNetwork is a streaming platform with a focus on community engagement, consumer compensation, and an innovative approach to streaming. We are seeking \$100,000 in funding to launch our advertising component, which will allow brands to reach our engaged audience in a more effective and efficient way.

PROBLEMS AND SOLUTIONS:

PROBLEM 1: LACK OF COMMUNITY ENGAGEMENT IN STREAMING PLATFORMS

Solution: Touch Network focuses on community engagement, creating a platform where users can interact, engage, and feel a part of a community. This approach not only retains users but also attracts brands looking for highly engaged audiences.

PROBLEM 2: INEFFICIENT ADVERTISING MODELS

Solution: Traditional advertising models often lack precision and efficiency, leading to wasted resources and missed opportunities. Touch Network's advertising component allows brands to reach engaged audiences effectively and efficiently, maximizing the impact of every advertising dollar spent.

PROBLEM 3: INADEQUATE COMPENSATION FOR CONSUMERS

Solution: Most streaming platforms do not compensate consumers for their time and data. Touch Network introduces a consumer compensation model, rewarding users for their engagement and participation, which in turn, increases user retention and attracts a wider audience.
